

Office 365

Office 365 is available for subscription, providing organisations with continuous access to the latest technology without the high starting costs. Licenses are assigned to the users and each user can install Office 365 on up to 5 computers and on an unlimited number of mobile devices.

Microsoft support is very limited for users. Therefore, buying your licenses through Serval Systems will put your business at a significant advantage to competitors who do not. Not only will they be at the same price as if you had bought them directly, but you will have access to a highly experienced support team that is always available.

We can assist you with migration from on-premise or hosted Microsoft Exchange environments, Lotus Notes and other, web based mail systems. We can also advise on and produce the best migration strategy for your organisation.
